

APhA Pharmacy-Based Immunization Delivery Program

Time	Content
7:30 – 8:00am	Login and check in via Zoom
8:00 – 8:15am	Welcome, Introductions and Acknowledgements
8:15 – 10:00am	Clinical Review
10:00 – 10:15am	<i>Morning Break</i>
10:15am – 12:00pm	Clinical Review Applying ACIP Immunization Schedules Screening Patients to Identify Contraindications and Precautions
12:00 – 12:30pm	<i>Working Lunch</i>
12:30 – 2:30pm	<i>Adverse Event Following Vaccination</i> <i>Communicating with Patients</i> <i>Managing a Pharmacy-Based Immunization Program</i> <i>Planning Your Service</i> <i>Documenting and Record Keeping</i> <i>Staying Up-to-date</i>
2:30 – 2:45pm	<i>Afternoon Break</i>
2:45 – 5:00pm	<i>Strategies for Increasing Immunization Rates</i> <i>Vaccine Administration Techniques</i> <i>Skills Assessment Directions</i> <i>*dismissal is dependent upon the length of time it takes to review the required APhA Program content</i>

Skills Training and Assessment

Submit the APhA Injection Technique Assessment from to the University of Florida College of Pharmacy (cesupport@ahc.ufl.edu) within 30 days of the live seminar to receive the attendance code.

Live Seminar Learning Objectives

The second component of the **APhA's Pharmacy-Based Immunization Delivery** certificate training program (14th Edition) is an active learning seminar focusing on pharmacy practice implementation.

The live training seminar is based on the experience of practitioners involved in immunization advocacy and administration. The training seminar reinforces and expands on the self-study program and addresses areas such as immunization needs, legal and regulatory issues, and injection-technique training. Participants will be expected to practice giving intramuscular and subcutaneous injections.

After participating in the Live Seminar, the participant will be able to:

- Describe strategies for increasing immunization rates, including physician collaborations, community level activities, and immunization coalition activities
- Describe pharmacy operations and a process for administering vaccines in various pharmacy practice settings
- Evaluate patient histories and make patient-specific recommendations based on the appropriate immunization schedule
- Demonstrate effective strategies for communicating with patients who have concerns about vaccines
- Describe current evidence regarding vaccine safety
- Recognize the signs and symptoms of adverse reactions that can occur after vaccination
- Describe procedures for management of patients with adverse reactions to vaccination that constitute an emergency
- List the steps for administering currently available intranasal and intradermal vaccines
- Demonstrate appropriate intramuscular and subcutaneous injection techniques for adult immunization

All participants are strongly encouraged to obtain CPR or BCLS certification. However, certification is not a prerequisite of the program. A Certificate of Achievement is awarded to participants who successfully complete all program requirements. The Certificate of Achievement is invalid, however, without written proof of current CPR or BCLS certification.
